

MediaCoin Inc ICO Walkthrough for MyEtherWallet.com

Cryptocurrency “Ethereum Classic” (ETC) is used for this transaction. MyEtherWallet.com also supports “Ethereum” (ETH) which is used with different addresses. These instructions convert cryptocurrency into tokens, participating in our Initial Coin Offering (ICO) for the Quantum MediaCoin Token (QMCT). When the ICO is over (Feb 28,, 2018), these directions won't work anymore and ETC/ETH will be automatically refunded.

- 1) Start by going to MyEtherWallet.com. In the top right corner of MEW switch the network to “ETC (Epool.io)”. Ethereum Classic is the only coin that is accepted for MediaCoin at this time. Then create a new wallet or log into your preexisting wallet.

- *If this is a new wallet SAVE Keystore / JSON FILE IN A SAFE LOCATION!**
- *SAVE YOUR PRIVATE KEY TOO!**

2) In the bottom right corner of your MEW account, add the Token

Contact Address for MediaCoin:

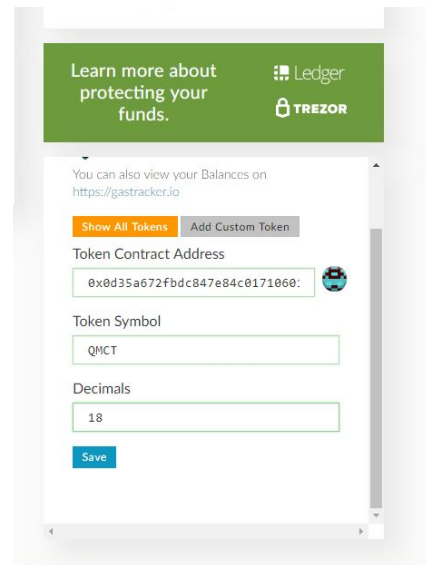

0x0d35a672fbdc847e84c0171060105944a951aa35

Symbol:

QMCT

Decimals:

18

3) Go ahead and load your ETC onto your account. When you're ready to buy set your parameters to the following:

Gwei (it's located in the top right dropdown menu by the Network dropdown)

1

To address:
